

SF-Rima - Project Report # 7

Project:

**Matthew Frank Condominiums
Marnella Communities,
St. Johns, Oregon**

SF-Rima™

Eco-friendly condominiums spring to life in St. Johns (Oregon)

The Matthew Frank Condominiums is an urban redevelopment in St. John's, one of the city of Portland's last undiscovered neighborhoods.

The Matthew Frank is *Earth Advantage Qualified* which not only benefits the future residents with energy savings and improved air quality, but the community benefits from the recycling of materials from the original building and the minimizing of non-pervious surfaces to minimize water runoff.

The Matthew Frank has had sustainability in mind from the beginning.
