

SF-Rima - Project Report # 10

Project:

Santa Barbara Shores Park and Sterling Preserve, Goleta, CA

21,000 sq.ft. SF-Rima™

SF-Rima™ Permeable Paving Stone System used for entry drive and parking area for new nature preserve in Goleta, California.

The installation of 21,000 square feet of SF-Rima™ Permeable Paving Stone System met the ecological needs of the site as well as vehicular traffic and parking considerations.

The Sterling Preserve, an environmentally sensitive habitat, required a permeable pavement that would not allow pollutants to flow into the native grasslands.

Project Report provided by John Surratt, Angelus Block, California
