

SF-Rima - Project Report # 23

Project:

Town Centre Park, Coquitlam, BC

Parking spaces

Landscape Architects:
Sharp & Diamond, Vancouver, BC

22,000 sq.ft. SF-Rima™

Lafarge Lake with its surrounding landscape, trails and wildlife invites citizens and visitors to enjoy the natural character of this park.

Town Centre Park is located in central Coquitlam, British Columbia. This park with its multi-million dollar upgrade features all-season artificial sport turf fields on an area of 103.5 acres. It offers many amenities:

- Evergreen Cultural Centre
- Percy Perry Stadium
- Lafarge Lake
- Sports fields
- Pedestrian trails
- Splash pad
- Skateboard park
- Basketball, beach volleyball and tennis courts

SF-Rima™ permeable pavement enhances the environmental approach of this project.

New parking spaces were paved with SF-Rima™ permeable paving stone system to allow water infiltration through wide joints to filter through coarse aggregate into the native soil. Permeable pavements are recognized by the Environmental Protection Agency as a BMP, suitable for improving stormwater quality and reduces excess runoff quantities.
