Garden Wall

SF-TEGULA™ Garden Wall

The tumbled blocks for low walls

SF-TEGULA™ Garden Wall is the ideal block for lower walls in gardens, parks, golf courses and for other applications. Its rustic appearance compliments today's trend of timeless, beautiful, decorative and nostalgic landscape designs. Ideal for the do-it-yourself market: Only one stone size, weighing not more than 15 kg (33 lbs.).

The new **SF-TEGULA™ Garden Wall** blocks have grooves on the top and bottom sides. Special patent protected plastic devices are placed in the grooves. These devices are designed in such a way that they consist of a trapezoidal piece which anchors in the groove of the stone. And a truncated cone piece which allows rotation of the adjacent stone, and therefore the creation of a **curved** design.

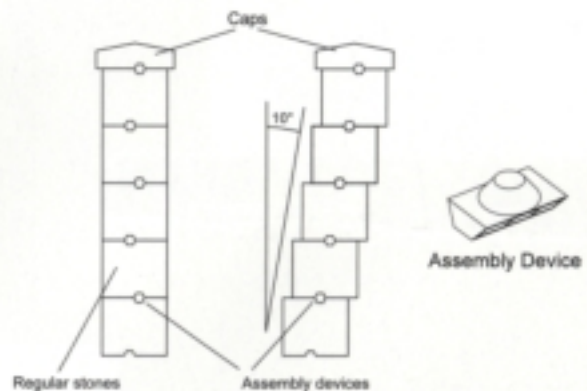

SF-TEGULA™ Garden Wall under construction. Adding the caps, this wall design is attractive from both sides.

SF-TEGULA™ Garden Wall blocks are covered under Patent Application 196 16 622.5, the assembly devices under U.S. Patent 5,480,267. Can. Patent Application No. 2119458. SF-TEGULA™ is a trademark of SF Concrete Technology Inc., Mississauga, Ont.

Many different wall appearances can be created:

- Vertical walls
- Sloped walls with step settings
- Walls with niches
- Walls with changing straight lines
- Concave and convex curves
- up to a height of approx. 1m (3.3')

SF-TEGULA™ Garden Wall is another outstanding product of the worldwide SF group of concrete manufacturers.
